

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	30 September 2026
Team ID	6ab6292ddcdae33acb3906da
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Item	Details
Team gathering	Team members: [Member 1], [Member 2], [Member 3], [Member 4]. Session length: 1 hour.
Goal	Find the best way to import spreadsheet data into ServiceNow without manual entry.
Problem statement (How might we...)	How might we import spreadsheet data into ServiceNow tables quickly, accurately and without duplicate records?

Key rules of brainstorming: stay in topic, encourage wild ideas, defer judgment, listen to others, go for volume, and if possible be visual.

Step-2: Brainstorm, Idea Listing and Grouping

Brainstorm: ideas written by each team member

[Member 1]	[Member 2]	[Member 3]	[Member 4]
Upload Excel file as a Data Source	Map columns using a Transform Map	Use Coalesce on Employee ID	Trim spaces and fix case with a script
Load rows into an Import Set table	Use Auto Map Matching Fields	Update existing records instead of duplicating	Convert dates to one format

Use a CSV file as an alternative	Create a custom target table	Check Transform History for errors	Schedule recurring imports
----------------------------------	------------------------------	------------------------------------	----------------------------

Group ideas: similar ideas clustered under a theme

Group	Ideas
1. Data loading	Excel/CSV Data Source; load rows into Import Set table
2. Field mapping	Transform Map; Auto Map Matching Fields; custom target table
3. Data quality	Coalesce on unique field; update instead of duplicate; trim and case-fix script; date format conversion
4. Monitoring and automation	Transform History error check; scheduled imports

Step-3: Idea Prioritization

Ideas are placed on a grid by importance (how much positive impact) and feasibility (cost, time, effort and complexity).

	Lower feasibility	Higher feasibility
High importance	Scheduled imports	Data Source + Transform Map; Coalesce on Employee ID; Auto Map Matching Fields
Low importance	Custom target table for every file type	Transform script for trim and date format; Transform History check

Selected for the project: Data Source + Transform Map, Coalesce on Employee ID, and a transform script for data cleaning. Scheduled imports are kept as future scope.
